
Policy Statement

Quality Policy

Scorpion Oceanics is committed to providing world class products and services to a number of markets that include Defence, Seismic, ROV, Oceanography, Nuclear and Diving and to complying with all applicable legislation and other requirements surrounding its activities.

Scorpion Oceanics has developed the management system to enable the business to flourish and develop in a manner that appeals to our customers and brings satisfaction to the staff.

The Company relies on the co-operation of each member of staff to implement and maintain the management system and seek recommendations from the staff to bring about continual improvement.

The targets and aspirations are decided annually at a Director's board meeting and monitored throughout the year at management meetings. Additionally, the management system will be reviewed by the directors at least annually to ensure its continuing suitability, adequacy and effectiveness.
